Part 1: News and infos

Part 2: Detailed reports of the national co-ordinators

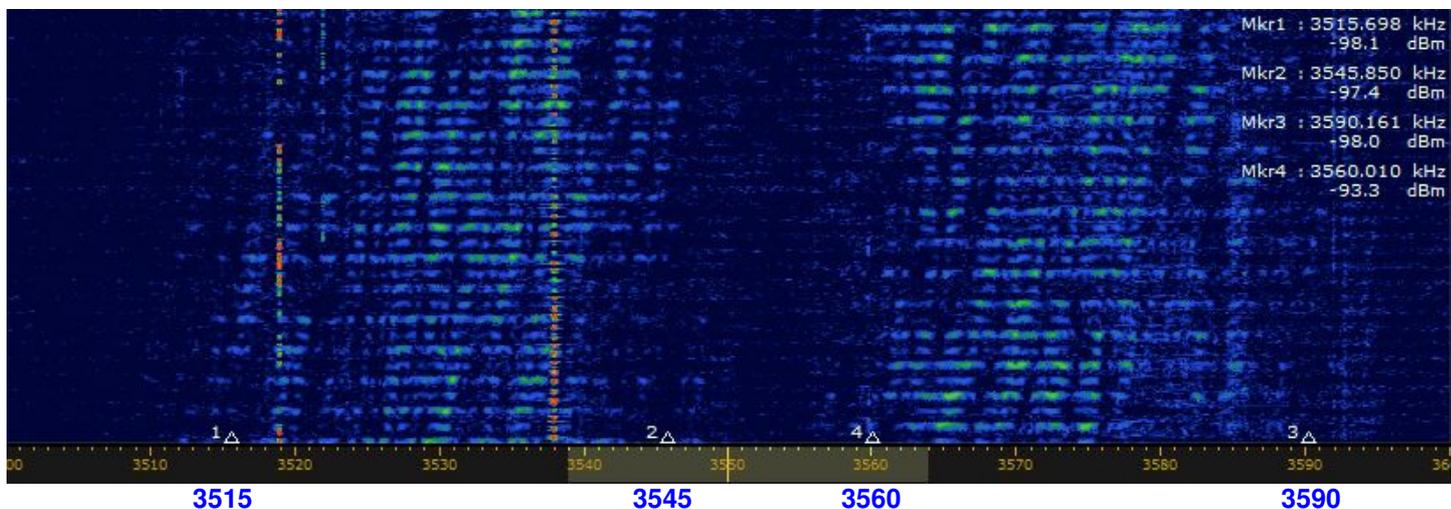

Part 1: News and Infos

1. Russian OTH Radar on 80 m still very active

A Russian OTH Radar was transmitting between 3515 – 3545 and 3560 – 3590 kHz (simultaneously), always 30 - 35 kHz wide and 43.5 sps. The location was the area of Makhachkala, Caspian Sea. Amateurradio and many other services were disturbed in the evening hours. The German and Dutch PTTs were informed.

Recording by DK2OM: <http://www.iarums-r1.org/iarums/sound/3570-rus-otr.wav>

Screenshot: DK2OM with Perseus – Russian OTH Radar on 80 m on April 26th

2. Iran OTH Radar daily on 10 m in April

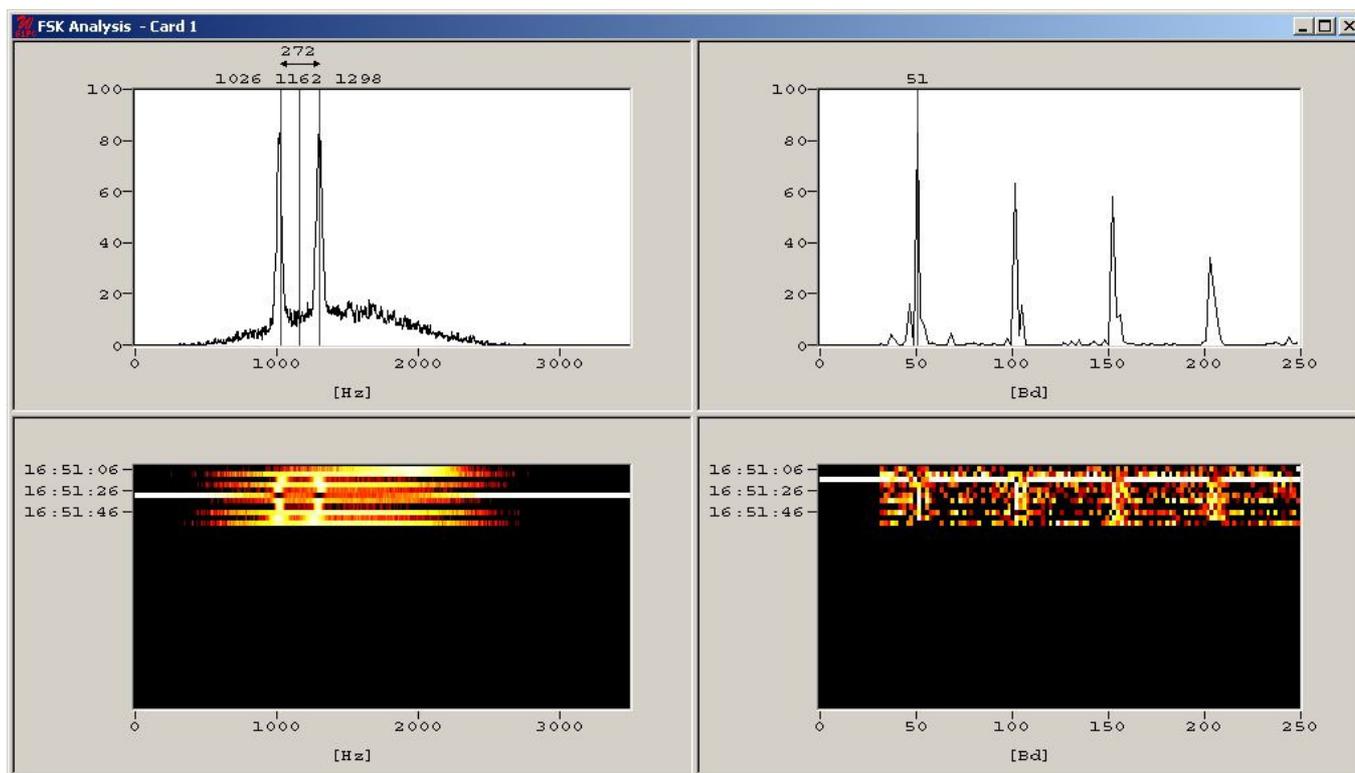

The Iran Radar was daily active on 26000 – 30000 kHz transmitting bursts with 307 and 870 sps and 60 kHz wide and often jumping. The splatters covered 700 kHz and more. The system was even heard in Brazil and Australia. The German PTT (BNetzA) sent an official complaint to Iran. OE3GSA informed the Austrian PTT.

3. Spanish fishery on 3774 kHz in USB

Spanish fishermen disturbed a German amateur net on 3777.5 kHz (LSB) every morning at 0600 utc. The illegal fishery net worked on 3774.0 USB often using the vocoder CRY2001 not respecting any amateur voice traffic as usual.

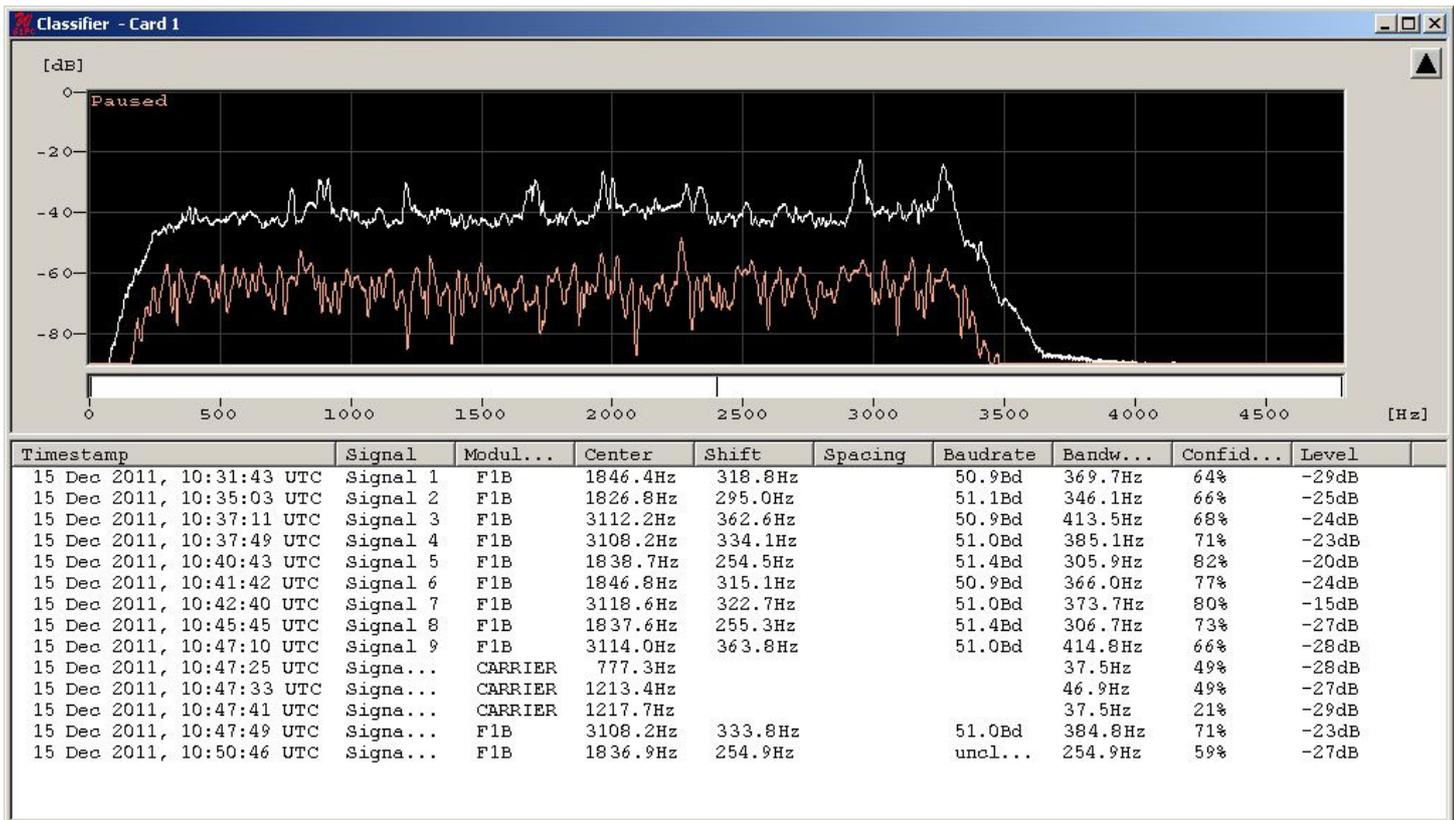

4. Spanish GPS buoys on 28 MHz

Spanish GPS buoys are the new threat of our 28 MHz-band. You can find their bursts between 28000 and 28500 kHz transmitting in F1B with 51 Bd and about 300 Hz shift. They were observed and measured by DK2OM and HB9CET. Location: Atlantic Ocean, west of Portugal. The Portuguese Monitoring System informed the Portuguese authorities. **Screenshot: DK2OM with Wavcom W-Code FSK analysis showing Baudrate and shift**

The Wavecom Classifier was an excellent tool during our observations. Many thanks to HB9CET, CT4AN and CT4IWW for assistance! [Screenshot: DK2OM with W-Code and Classifier](#)

Recording by DK2OM: <http://www.iarums-r1.org/iarums/sound/f1b-51.wav>

5. Russian military traffic and radar on our bands

Russian military traffic increased on 7, 14 and 21 MHz. Modes: F1B, PSK, OFDM60, vocoder Yakhta. The Russian OTH radar Nizhniy Novgorod was often active around 14250 kHz (50 sps, 20 kHz wide) during the morning hours.

6. Radio Eritrea and Radio Ethiopia

The hostile brothers were not audible on 7100 – 7200 kHz in Europe in April.

7. Membership of ARR in IARUMS

YO9RIJ Petrica Stolnicu, is the vice president of A.R.R. the new radioamateur society (**Asociatia Radioclubul Romaniei- Romanian Radioclub Association**). Petrica told me, that he is very interested in supporting our Monitoring System. Problem: ARR cannot be an official member of the IARU, because the FEDERATIA ROMANA DE RADIOAMATORISM (FRR) is already IARU member. PB2T, President of IARU Region 1, said that only one national society can be an IARU member. So ARR will be a non-official member of our system until the situation will be cleared. Anyway: Petrica is welcomed to our system and a participant of our services.

8. DARC Monitoring System and IARUMS Region 1 Meeting at the Hamradio 2013

The annual meeting of the DARC Monitoring System will take place on Saturday June 29th at room "Swiss" from 1000 – 1130 local time.

Program:

Opening by DK2OM

Lectures:

Mr. Grim (German BNetzA) tells us how the BNetzA is handling complaints of the DARC Monitoring Systems

The IARUMS Region1 Vice Coordinator HB9CET, Peter Jost, gives us valuable informations about the monitoring practice.

A small IARUMS Region 1 meeting will take place at 1140 local time at the stand of the DARC HF-Department. All Coordinators and friends are invited to meet us there.

ARSK MONITORING OVERVIEW FOR APRIL 2013

The only significant intercept was of two USB stations using a Chinese language (but which of the eight major ones was not known) on 7072 kHz, heard strongly on 21st April at 0638Z. They have not been heard again, however. Khartoum, Asmara, Addis Ababa and Hargeisha maintained their broadcasts on the 40 meter band as usual

E.H.M. Alleyne, 5Z4NU
 ARSK National IARUMS Co-ordinator
