Part 1: News and Infos

1. 10120 kHz – Ukraine SZRU in A3E (AM)

The Ukraine Foreign Intelligence Service “SZRU” was active on 10120 kHz in A3E on every Wednesday at about 0830 UTC. The carrier started at 0830 utc, the messages began at 0843 utc. A female voice spelled encrypted MSGs like figures. Don’t forget: The 10 MHz-Band is a shared band!

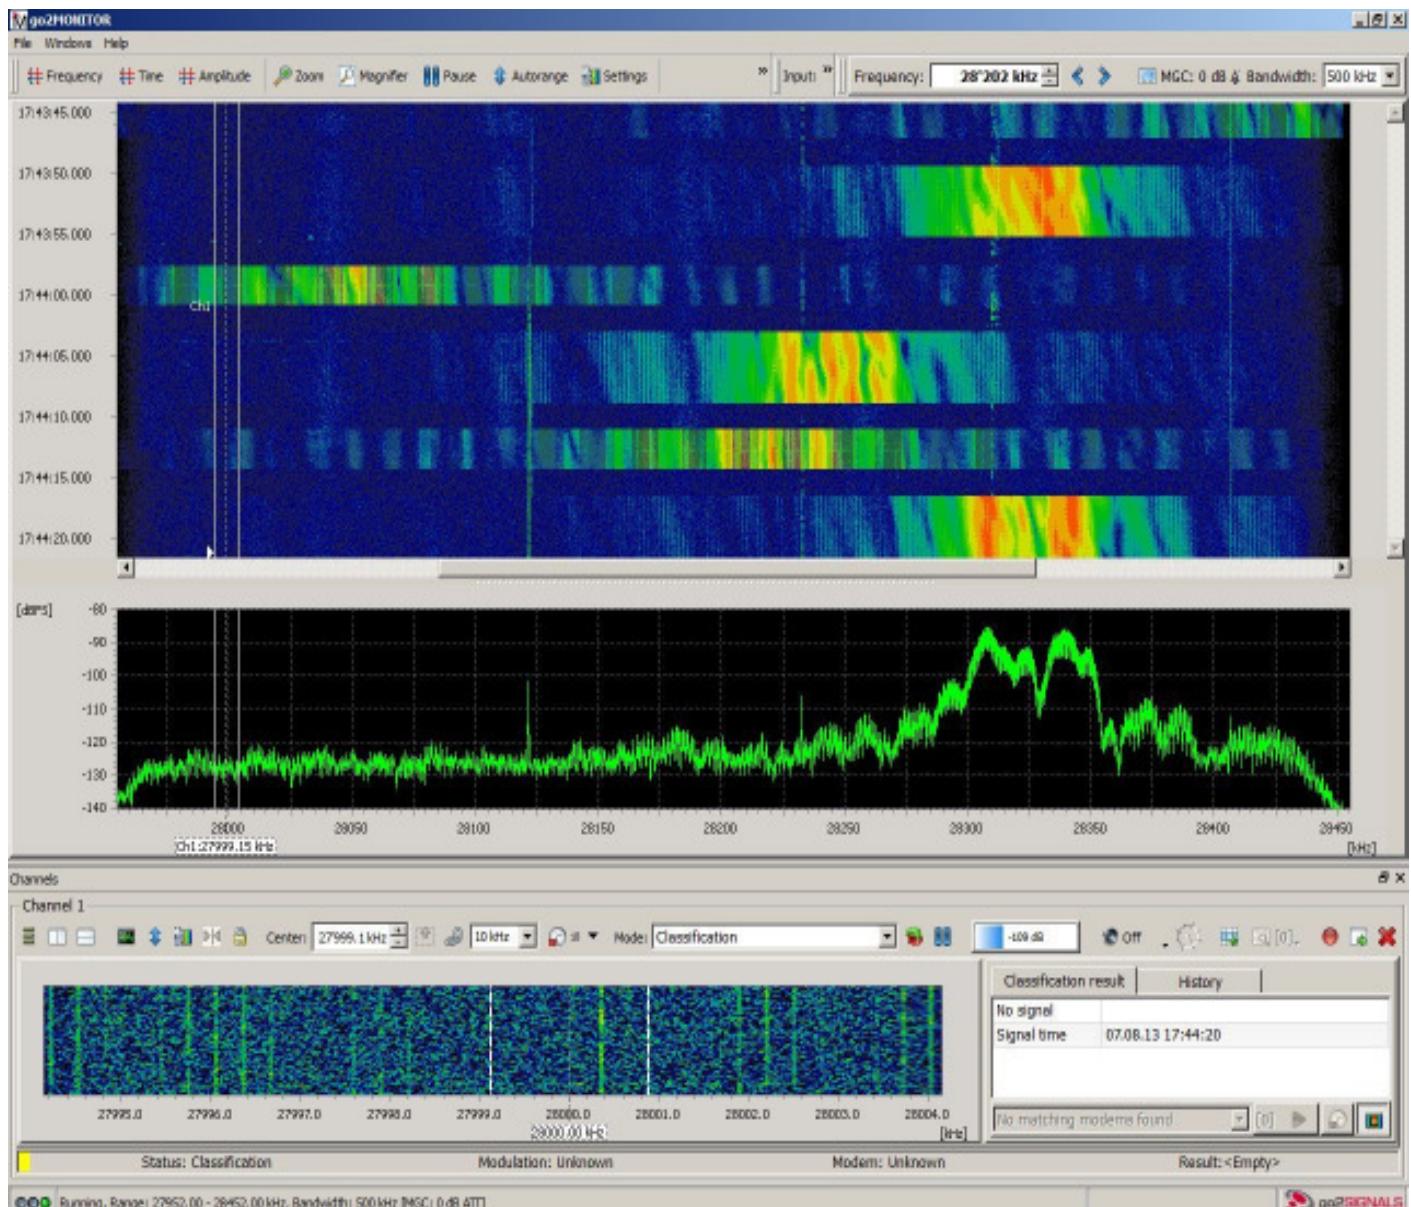

soundfile: <http://www.iarums-r1.org/iarums/sound/10120-ukr.wav> (recording by DK2OM)

2. 21060 kHz now free – success for Region 1

The Ukraine military system AT3004D (12 x 120 Bd BPSK) left 21060 kHz after a complaint by the German PTT (BNetzA). Many thanks to the German BNetzA!

3. Iran OTH radar on 28000 - 29700 kHz – still active

The jumping Iran radar observed by the “GO2-Monitor” from Procitec. **GO2** has direct access to the Perseus. Screenshot: Iran OTH radar with GO2 – bandwidth 500 kHz – testversion operated by DK2OM:

The sonogram window is much larger and shows more details than the small original Perseus window. The classifier could be more reliable. If you want more infos:

<http://www.go2signals.ch/home.html>

4. 3700 - 3800 kHz- Russian OTH radar daily

The Russian OTH radar at Makhachkala (Dagestan – Caspian Sea) was daily active and audible in Central Europe in the late evenings. Parameters: 43.5 sps covering 30 – 35 kHz. The NATO F1B on 3782 kHz from Portugal was disturbed.

5. 2 m threatened by pirates

I got reports from different countries about pirates on our 2 m-band. Spain: Taxi-nets on 2 m in FM Canary Islands, Spanish fishery in the Bay of Biscay and private users in Germany, FM too. Please observe and inform your national authorities in such cases. The cheap 2 m-handies from Far East are welcomed by pirates.

6. 3540 kHz – French fishery

French fishery in USB, active every evening. No calls, no idents as usual. The 80 m-band is assigned to Amateur Radio on primary base but not exclusive. This band is not assigned to pirates.

7. 14000 and 21000 – fishery meeting points

Both frequencies were daily abused by Portuguese and Spanish fishery (Galician fellows) in USB and various times.

8. Beacon “V” on 7027.5 and 7122 kHz

The “V” beacon on 7027.5 has been found by HB9CET and DK2OM in 2009 the first time. Now we received the beacon again. The signals are rather weak, so you can see them only on the sonogram sometimes. We got reception reports from 5Z4NU, DJ3IW, HB8CET, OE3GSA, PA2GRU, SM7WT, VK4TJ and DK2OM.

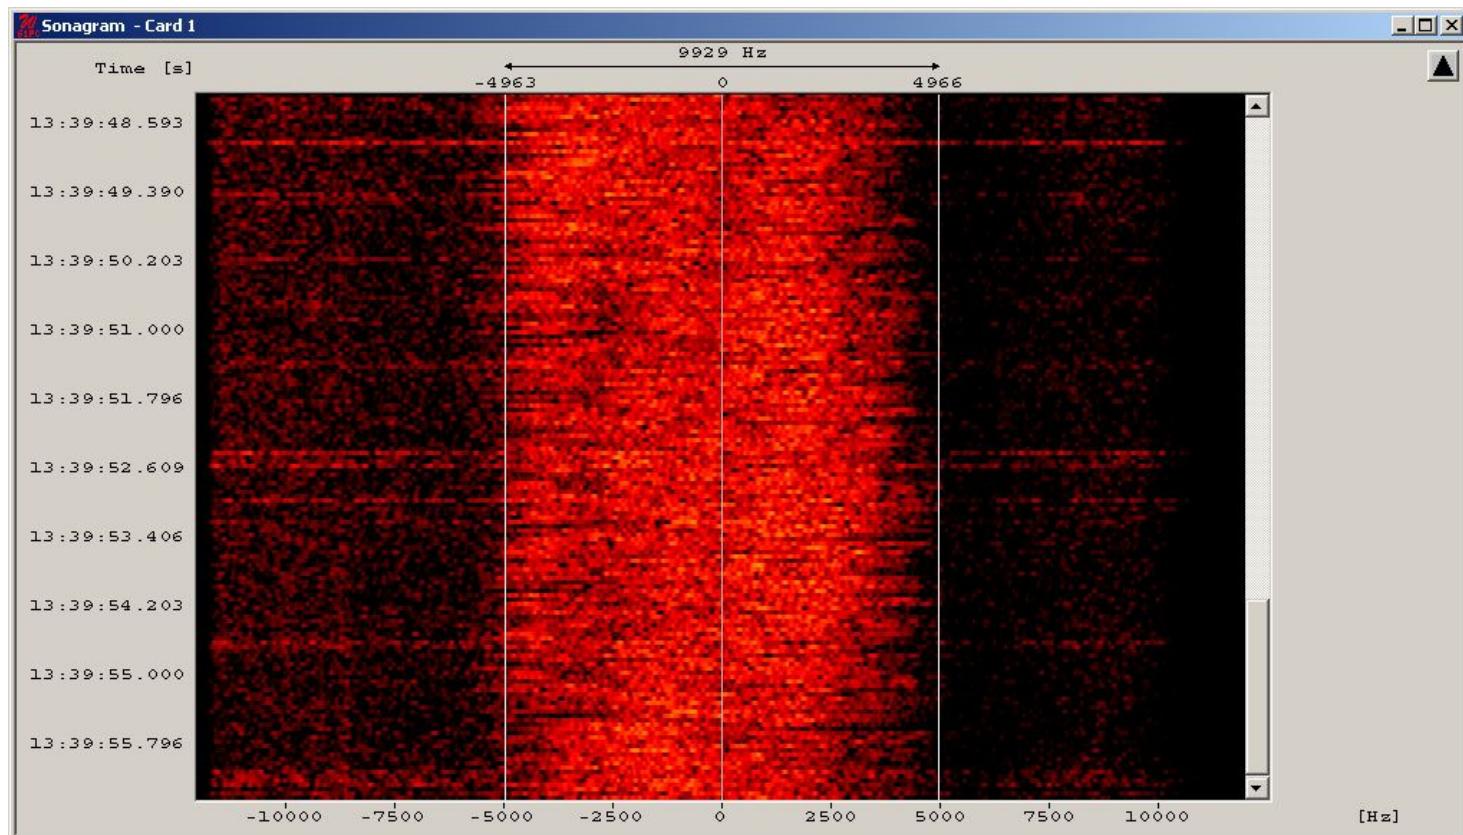

On 7122 kHz many “V” signals were transmitted at the same time. The gaps between the centered “V” and the “V” below and above had 100 Hz. Possibly spurious elements caused by defective powersupply. The location of both transmissions was Bishkek, Kyrgyzstan, probably Russian military. Both transmissions were synchronous.

soundfile: <http://www.iarums-r1.org/iarums/sound/7027beacon-v.wav> (recording by DK2OM)

9. Digital broadband signal on 21000 kHz

The signal covered about 10 kHz and was active on August 25th all day. Location: Jekaterinburg.

Russian military traffic on our exclusive bands increased during August!

10. Recommendation: ITU – Technical identification of digital signals - PDF

 ALE (MIL-188-141A) = automatic link establishment *** MUX = multiplex *** Ui (unid) = unidentified *** Illicit = illegal ***
 UiILL = unidentified illegal *** BC = broadcast *** MIL = military *** PTR = printer *** NGO = non governmental organization *** ITU = ITU country abbreviation *** PRC = People's Republic of China *** PLA = People's Liberation Army *** MFA = Ministry of Foreign Affairs *** MOI = Ministry of Interior *** MOPO = Ministry of Public Order *** IARUMS = IARU Monitoring System *** UTC = Universal Time Coordinated *** pps = pulses per second (earlier radar systems) ***
 sps = sweeps/sec (radar systems) *** FMCW = frequency modulated continuous wave (OTH and coastal Radars)
 5BL = cyrillic 5 lettergroups

ARSK MONITORING OVERVIEW FOR AUGUST 2013

The only intruders detected were Radio Uganda on 7195 kHz, which continues in spite of several repeated complaints, Radio Hargeisha on 7120 kHz which continued as before with a very strong signal.

E.H.M. Alleyne, 5Z4NU

ARSK – Kenya – 5Z4NU (Ted)

H'd by	kHz	UTC	dd	mm	ITU	Ident	Mode	Details
ARSK	7120.0	vt	dly	8	Rep.of Somaliland	Hargeisha		Daily broadcasts.
ARSK	7195.0	0650 to mid-afternoon	dly	8	UGA	Uganda Radio	A3E	B'cast in KiSwahili, music, Luganda & English, to about 1200Z or later.

DARC 1 – Germany – DG0JBJ (Mario)

DG0JBJ (Mario) observed 17 OTH radars on 20 m, 11 OTH radars on 15 m and 2 OTH radars on 10 m (not included the numerous jumping Iran OTH radar emissions) in August 2013.

DARC 2 – Germany - DK2OM (Wolf)

FSK transmissions -> center frequency between mark and space

PSK transmissions -> center frequency - ALE (MIL188-141A) -> USB frequency

exclusive bands -> black – shared bands -> blue - voice traffic -> green - BC -> red

SH = shift --- SP = spread (radar) – SPS = sweeps/sec (radar)
