Part 1: News and Infos

1. 21000 – Russian vocoder Yakhta back again

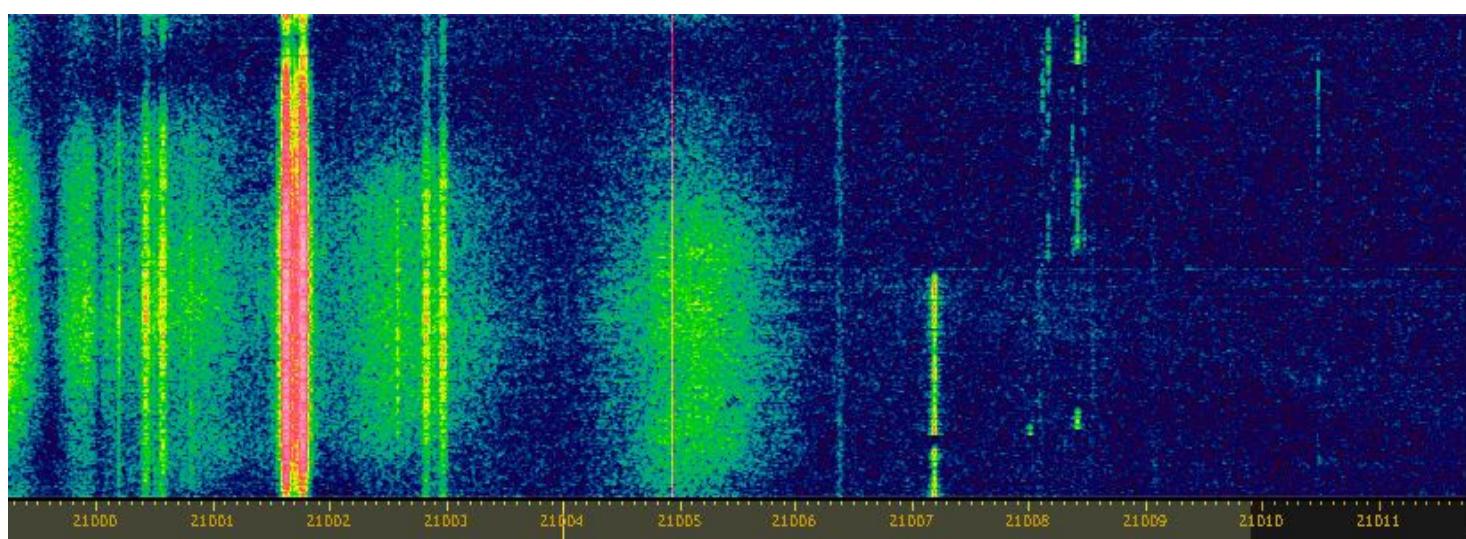

We were not surprised to meet this system again. The encrypted voice traffic was running on 21000.0 kHz on USB, the inband synchro F1B-signal (100 Bd – 150 Hz shift) was always audible and very strong. Location: Nizhny Tagil, Russia. Probably Russian military, real purpose unknown.

soundfile: <http://www.iarums-r1.org/iarums/sound/28347yakhta.wav> (recording by DK2OM)

The Wavecom sonogram is showing the encrypted voice traffic on USB and the inband synchro signal on 21001.5 kHz. (observe the red marker)

Here you can see the inband synchro signal (red marker!) and spurious emssions, same as in last winter. An earlier complaint by the German PTT has not been regarded.

2. Russian military digital traffic on exclusive amateurradio bands in September including spurious and harmonic emissions! (no radars!)

7 MHz-band: 21 QRGs – **14 MHz-band:** 19 QRGs – **21 MH-band:** 8 QRGs

3. Iran OTH radar on 28000 - 29700 kHz – still active

The jumping Iran radar was daily transmitting between 28000 and 29000 kHz with 307 and 870 sps and terrible splatters +/- 300 kHz.

4. CT4AN - Jose Francisco - REP national MS co-ordinator reports: (also reported by CT2IWW)

Actions against illegal communication in Portugal!

It's the second time ANACOM and the Portuguese Maritime Police act over illegal communications and interferences. The Portuguese Maritime Police, a branch of the Portuguese Navy, and the Communications Authority ICP-ANACOM made a control operation which resulted in confiscations on radio equipments and heavy fines to ten operators. Besides having the equipment confiscated, the operators face fines which may reach 1250€, close to 1650USD. The newspapers detail that the fiscalization was made on 28 vessels and 29 harboured stations, both on sea, inland and in waterways.

The authorities said that the operation was based on interference complaints to legal radio systems, including Amateur Radio Service, Areonautical Band, Maritime Service and commercial radio frequencies.

5. 3500 - 3800 kHz - Russian OTH radar as before

The Russian OTH radar at Makhachkala (Dagestan – Caspian Sea) was active on various days and audible in Central Europe in the late evenings. Parameters: 43.5 sps covering 30 – 35 kHz.

6. 7 MHz disturbed by Chinese OTH radars in Region 2 and 3

While observing the situation on 7 MHz in Region 2 and 3 I found Chinese OTH radars between 7000.0 and 7200.0 kHz. The systems were long lasting and interfered the whole Pacific Region including Japan, Australia and USA west-coast. Sometimes the radars were audible in Europe, too. Other Chinese burst radars appeared on 20 m from time to time with sweeprates of 66.66 sps, also audible in Europe.

7. 21 MHz – Australian OTH radar “JORN”

JORN = Jindalee Operational Radar Network – The Australian OTH burst radar “JORN” was daily on air between 21200 and 21300 kHz and audible in Central Europe in the morning hours.

8. 7000 and 3556 kHz (USB) – Spanish fishery with vocoder CRY2001

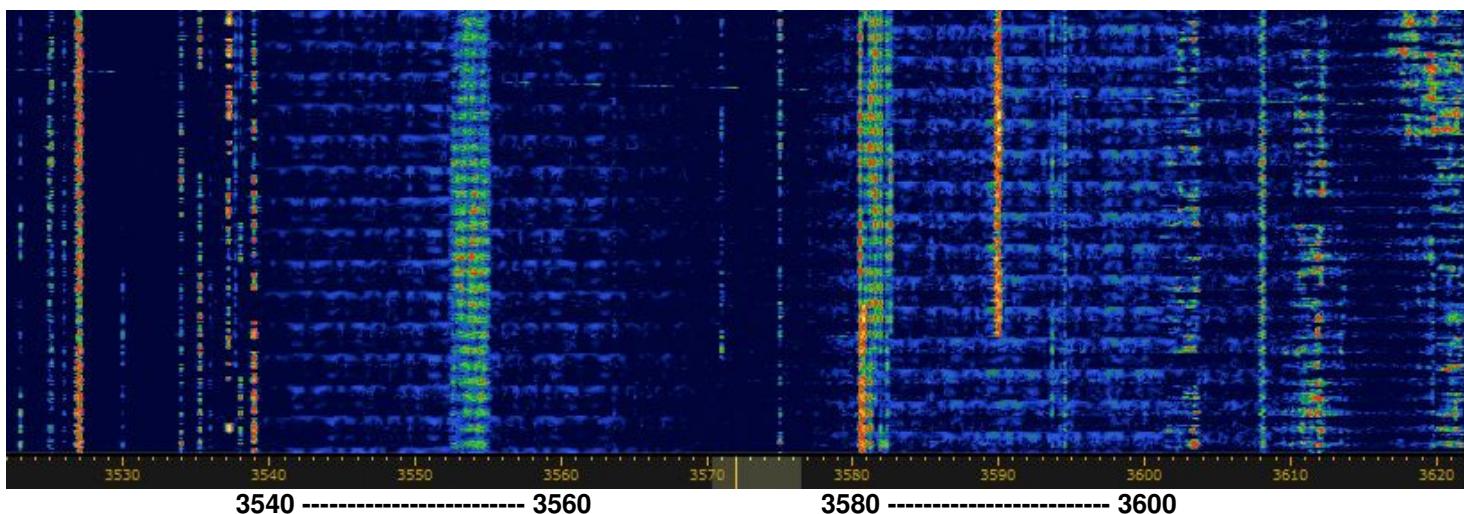

Spanish fishery tried to occupy 7000.0 kHz again. Parameters: USB with vocoder CRY2001 few days at 1900 utc. They tried 3556 kHz at 2000 utc, too.

9. Russian OTH radar Dagestan on 80 m – no change

The Russian OTH radar at Makhachkala disturbed 80 m on various days, in Central Europe audible in the evening hours with 43.5 sps and 30 kHz wide. Two systems were often transmitting at the same time. Military services in Europe were disturbed on this shared band.

Screenshot: DK2OM with Perseus on September 27th at 2000 utc.

soundfile: <http://www.iarums-r1.org/iarums/sound/3570-rus-othr.wav> (recording by DK2OM)

ARSK MONITORING OVERVIEW FOR SEPTEMBER 2013

The main intruders detected were Radio Uganda on 7195 kHz, which continues in spite of several repeated complaints, Radio Hargeisha on 7120 kHz which continued as before except between 6th and 23rd September when it was not heard. Two unidentified stations on 7045 kHz may have been in DRC

E.H.M. Alleyne, 5Z4NU

ARSK – Kenya – 5Z4NU (Ted)

H'd by	kHz	UTC	dd	mm	ITU	Identity	MODE	Details
ARSK	7045.0	vt	24	9	?	?		Vernacular, possibly DRC?
ARSK	7120.0	vt	1 - 5, 24 - 30	9	Rep.of Somaliland	Hargeisha		Daily broadcasts.
ARSK	7195.0	0650 to mid- afternoon	dly	9	UGA	Uganda Radio	A3E	B'cast in KiSwahili, music, Luganda & English, to about 1200Z or later.

DARC 1 – Germany – DG0JBJ (Mario)

DG0JBJ (Mario) observed 7 OTH radars on 20 m, 55 OTH radars on 15 m and 6 OTH radars on 10 m (not included the numerous jumping Iran OTH radar emissions) in September 2013.

DARC 2 – Germany - DK2OM (Wolf)

FSK transmissions -> center frequency between mark and space

PSK transmissions -> center frequency - ALE (MIL188-141A) -> USB frequency

exclusive bands -> black – shared bands -> blue - voice traffic -> green - BC -> red

SH = shift --- SP = spread (radar) – SPS = sweeps/sec (radar)
